TWD Fibres is a recognized expert and reliable partner when it comes to sustainably dope-dyed polyester yarns. The customer's colours are measured, formulated and filed in our in-house laboratory. Using our test spinning unit, we are immediately able to process and visualise the colours required by the customer. Our core competencies include all aspects of yarn processing and finishing. Your benefit: you get all the colour management processes from a single source. We follow your projects through – from the initial colour concept to series production.
DOPE DYEING IS OUR EXPERTISE AND PASSION!

TWD Fibres GmbH · Kunertstraße 1 · 94469 Deggendorf · Germany
